

Open Wet Ware  
.org

# Intro

- sharing of information in biological sciences and engineering
- forum for publishing the day-to-day research
- started in an MIT Biology lab one year ago
- now: 60 academic labs from 24 institutions

# Benefits

- remove the webmaster "bottleneck" - democratized contribution
- long term, searchable storage of lab information: what reagents are in what freezer?
- publicize your work prior to publication

# Software

- Dewikify extension (wiki page to static page)
- User Management System
- OpenWetWare software distribution planned

# Unique opportunities

- organizing of university courses
- your user page on OpenWetWare will probably be the top Google hit for your name
- collaborate with people across the world or just downstairs

# Questions
