M1D7: Complete sub-nuclear foci assay staining and data analysis

10/5/18 QUIZ

1. Stats lecture, prelab
2. Finish staining γH2AX foci
3. Visit microscope
4. γH2AX image analysis
5. Data analysis—ask questions while you're here!

Announcements

- Notebook due 10/6, 10pm
  - Graded in detail: M1D5
- Extra office hours:
  - Sat. (10/6) 10am-12pm, 56-302
  - Mon. (10/8) 12-5pm, 56-302
  - Prof Engelward: Wed. (10/10), 9am-12pm, 1-3pm
- Data Summary draft due 10pm, Wed. 10/10

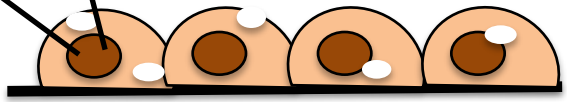
Complete γH2AX assay today

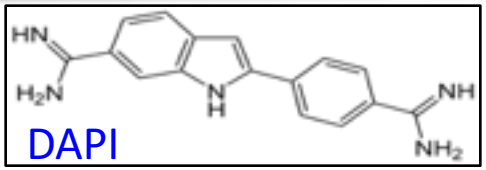
Phalloidin stain (F actin)

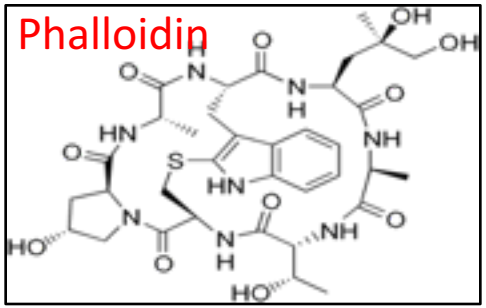
Together with Secondary Ab

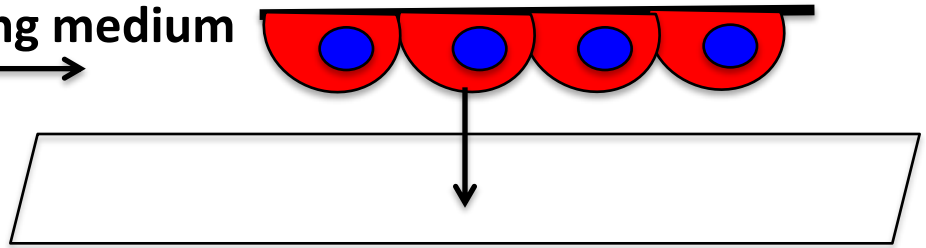
DAPI stain (DNA)

In mounting medium







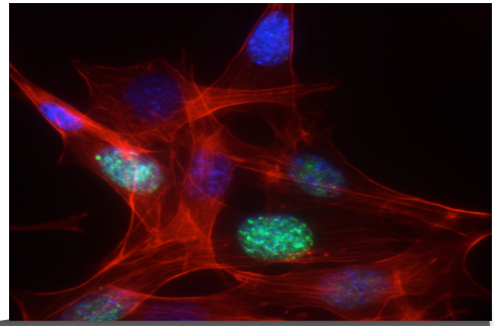


Mount on glass slide

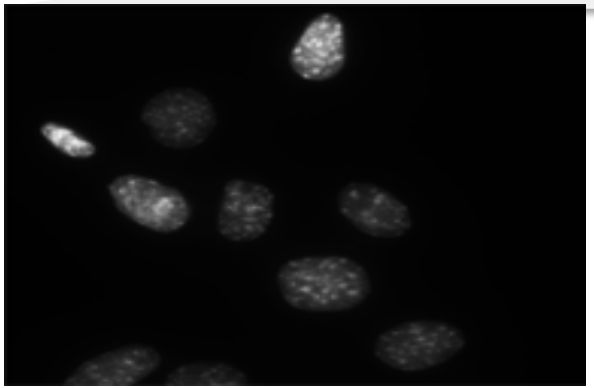
- dab SMALL amount of mounting media on glass slide
- Seal w nail polish

γH2AX Data Analysis

What is the total amount of γH2AX signal of each nucleus?

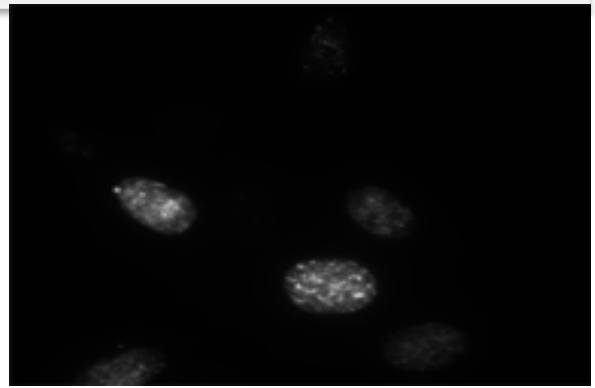


- Use DAPI channel to identify Nuclei
- Use ImageJ to quantify total FITC (γH2AX) fluorescence in each nucleus
- Imaged using same exposure times per channel across all conditions



Nuclei (DAPI)

450 ms

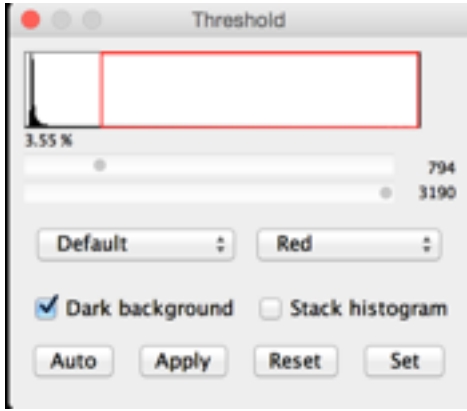


γH2AX (FITC)

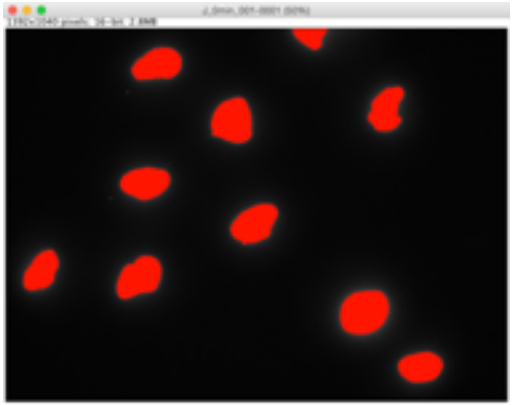
1s (30 min recovery)

800ms (60 min recovery)

γH2AX Data Analysis using ImageJ



- Pick a threhold value in the DAPI channel to identify nuclei—typically good to be consistent, use same threshold on all images.
- Identify nucleus location using DAPI channel, & quantify fluorescence in FITC channel.
- Normalize fluorescence intensity by area of nucleus



Perform analysis on resultant excel spreadsheet

RawIntDens / area

(a.u/px^2)

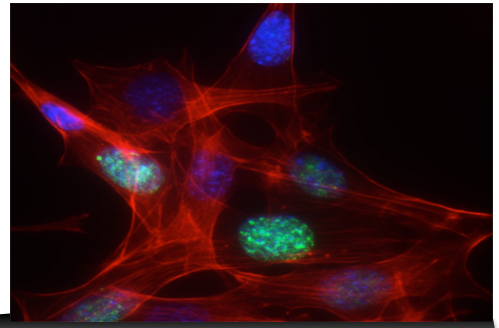
arbitrary units

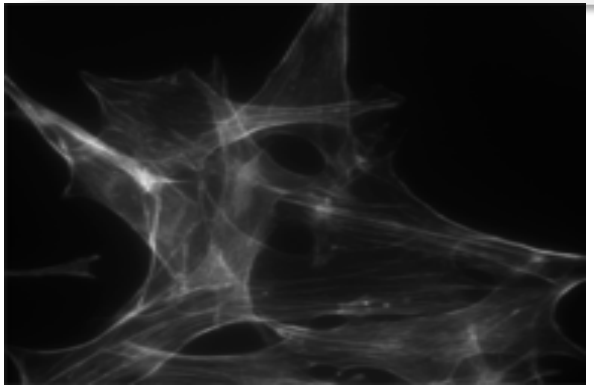
Compare:

- T vs. K @ H_2O_2 treatment or Recovery
- timepoints → fixed immediately after H_2O_2, 30m Rec, 1hr Rec

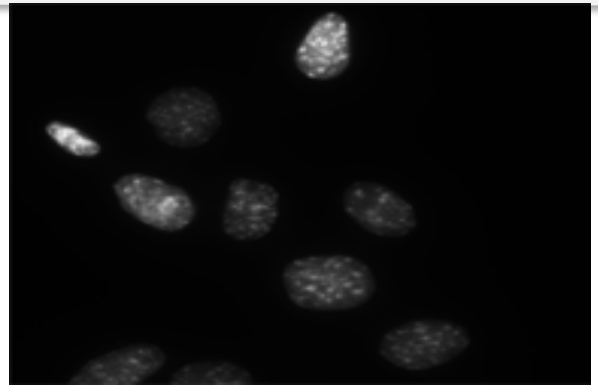
Make stacked images

- Use ImageJ to overlay and color the images
- Don’t forget a scale bar: 0.17 um/px

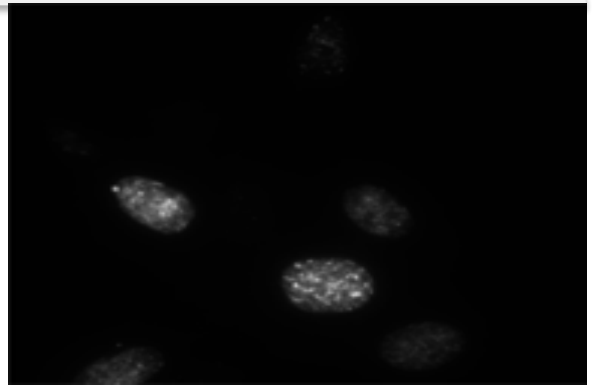




Actin (TxRed)



Nuclei (DAPI)



ϒH2AX (FITC)

Major assignments for Mod1

- **Data summary** draft
  - due by 10pm on Wed., October 10
  - revision due by 10pm on Sat., October 20

Summary content

1. Title
2. Abstract (paragraph)
3. Background & Motivation
4. Figures, Results & Interpretation
5. Implications & Future Work

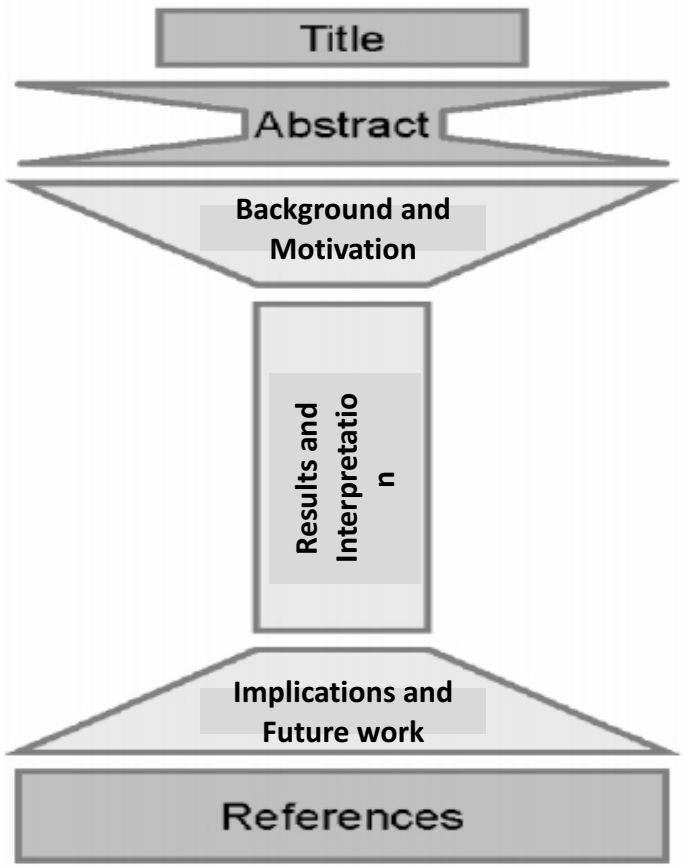
References

- **Mini presentation** due by 10pm on Sat., October 13
- Lab notebook for Mod 1 due by 10pm on Sat. October 6
- Blog post for M1 due by 10pm on Thurs., October 11

20.109 Blog Post

- You will receive an invitation to join the class blog
- Possible topics listed on the blog
- Details about use:
  - Do not publish MIT logo
  - Do not post photographs with names tagged
  - Do not write malicious comments
  - Do not plagiarize

M1 Data Summary



Title: take-home message
Abstract: the only page *not* in bullet points

ALL bullet points:
-background and motivation (include references)
- schematics (BER)

-Results and interpretation
- Cell loading
- Comet Chip analysis (team expt.)
- Comet Chip repair data (Engelward lab)
- H2AX assay (team & class data, images)
- Schematics?

Implications and future work

References (*see wiki for format suggestions*)

Background & Motivation

- Impact statement
  - general background
  - describe previous work in the field
- Specific background (e.g. BER, DNAPKcs, CometChip)
  - introduce topics, pathways and specific technologies necessary to understand the experiment
  - narrow focus to the specific question addressed in your study
- Knowledge gap/statement of problem
  - what is unknown, therefore motivating your study
- Hypothesis
  - what do you propose will be the outcome of your study
- A brief preview of your findings
  - Here we show…
  - end with broad implications of the study

cite PNAS paper Wood et al 2010

be specific to your experiments

The meat of your paper: Results & Interpretation

- Figures and captions
  - **Decide on these first**
  - Use subpanels
  - Text: limited on figure, explicit in caption
  - reasonable size
  - descriptive title
  - intro sentence in caption
  - caption descriptive of image, very light on methods (cell loading 10x image H2AX 40X image)
- Result bullets
  - Goal / intent / purpose of experiment = intro topic sentence
  - What you did: experiments and expectations, including controls
  - What you found: quantitatively describe your result, referring to the figure
  - What does this indicate: interpret your result, what does it mean?
  - What does this motivate you to do next: transition to next experiment

Implications & Future Work

- Start with a very similar ~~paragraph~~ to the last ~~paragraph~~ in your Background/Motivation (restate major results and broad implications)
- Follow same order as in Figures/Results
  - Describe your conclusions from your data
  - Describe caveats and suggest remedy
  - Identify unknowns and speculate within reason
  - Don't make huge generalizations or overreach
- Propose future experiments, identify new questions that arise
- Come back to (the same) big picture topic introduced in background

bullet

bullet

kinetics of damage Comet chip vs H2AX signal

find potential phosphorylation sites by DNAPK in BER proteins

In lab today

1. Finish staining γH2AX coverslips
2. γH2AX image analysis (get files from me!)
3. Finish data analysis and post to wiki
4. Stats exercise
5. Continue working on Data Summary
